NUMBER 45

ANTIOCH PUPILS TAKE ILLINOIS POULTRY AWARD

Turnock, Hills Win Championship; School Team Places Fourth

John Turnock and Raymond Hills are the Illinois state high school poultry judging champions!

This was determined at the annual Illinois state high school judging contests which saw the Antioch Township high school judging team win fourth place among the 202 schools competing. The tournament was held in the stock pavilion at the College of Agriculture, University of Illinois, in Champaign-Urbana last week.

Turnock and Hills outscored the stiffest competition offered in the 16 years of the contest's history, the University heads explain. There were 201 schools entered in the poultry judging division.

Others Finish High.

Robert Denman, Willis Griffin and Harold Edwards who were entered in the fat-stock judging contests, garnered enough points to capture fourth place laurels from the 134 schools competing in their division.

In the other three divisions, the Antioch boys finished high in the rating but failed to climb within the first ten highest places. The other divisions and those competing were: dairy judging—Frank Verkett, Richard Waters and John Galliger; corn judging—Donald Minto and Frank Zelen; grain judging—Clarence Dunford and Richard Burnette.

"We have been trying for 12 years to win a major victory so we could represent Illinois as a 'National contest,'" Coach C. L. Kull stated in speaking of the poultry champions and the other members of the team. "Determination won for us. Much credit is due the members of the team. They are a fine lot of boys."

Beat Record Since 1920.

He explained that the 12 members of this year's team made the best record of any Antioch team since the establishment of the high school's Vocational Agricultural Department in 1920.

Turnock and Hills will represent Illinois at the National contests in Kansas City next October where they will compete for the poultry judging championship of the United States, Coach Kull said. Each boy received a gold medal, the state championship award, and a large shield was awarded to the Antioch Township high school. Kull also received a gold medal for his coaching.

Verkett Elected Vice President.

At the annual convention of Illinois Association of Future Farmers of America, Frank Verkett was elected vice-president of the organization and was selected as one of the 78 to receive the State Farmer degree. He will have the job of conducting all activities of the organization in the northeastern section of Illinois. He will be a senior in the high school next fall.

A banner was also awarded to the high school for winning second place in the chapter activity contest held in the northeastern section of the state.

Stages Floor Shows at Round Lake Resort

Now playing at Renahan's Resort, Round Lake, Ill., starting Saturday, June 22 and every Saturday and Sunday thereafter, Mr. Renahan presents a high class floor show consisting of dance teams, singers and dancers and novelty attractions. Dick Dale is master of ceremonies and featured are Don and Mickle Sommers, novelty dance team; Louise Seymour, a talented dancer doing different styles of dancing; Phil Bernard in impersonations of famous movie and radio stars.

Swanson Sees Shriners' Conclave at Washington

Mr. and Mrs. Fred B. Swanson of Antioch were two of more than 100,000 people who were in Washington, D. C., last week for the annual Shriners' convention. They motored to the nation's capital and took trips to Philadelphia and New York City. Mr. Swanson, who makes most of the Shriners' conclave, declares that this year's was one of the best he has attended. He is affiliated with the Shrine at Hammond, Indiana.

ANTIOCH TEACHER BECOMES FACULTY MEMBER AT MACOMS

Mrs. Ruby Riehoy left Tuesday for Macomb, Illinois, where she has charge of the cafeteria and is head of the Home Economics department at the Western Illinois State teacher's college there, for the summer.

House of Davids Meet Kellermen In Diamond Tilt

The bewhiskered gents with the unshorn tresses from Benton Harbor who play baseball for the House of David, have been imported by Nick Koller, Lake county's leading baseball enthusiast, to meet his club of aspiring major leaguers Monday at 6:15 on Weiss Field, Waukegan.

Koller, who has probably started more youngsters on big league baseball careers than anyone, has assembled a team of lads slated for the majors to match what is reported to be the best team ever sent on the road by the Benton Harbor organization. Adolph Wrobel, with Rock Island, who equalled the all-time pitching record of 16 consecutive wins by Walter Johnson of the Washington Senators and "School Boy" Rowe of the Detroit Tigers, will pitch for the Kellermen.

James Quon, the trickster who halfed the Chicago Cubs in their World's Series shelling by the Athletics, or Grover Cleveland Alexander, former Cub performer, will start on the mound for King Ben's bearded experts.

Channel Laker Aids Judge in Settling Waukegan Recount

With Einar Sorenson of Channel Lake carrying the burden for him in the recount, Frank Wallin, Democrat, remains in office as city clerk of Waukegan by a margin of 21 votes, according to the ruling before Judge Perry L. Persons yesterday.

When Waukegan gained national fame as the city of political recounts starting with the Tyrell-Doolittle tangle last fall, Sorenson who is an expert on ballots and election law, was enlisted by the court as the Democratic representative.

Howard Mastne Gets Western Laundry Office in Antioch

Howard Mastne of Antioch was appointed representative for the Western Laundry & Cleaners for the Lakes region. It is announced by officials of the company from their headquarters in Chicago. Because of an increase in the volume of laundry handled by this organization in and around Antioch, company heads established the local office as a convenience for their local patrons.

BUILDS HOME AT BLUFF LAKE

Dr. and Mrs. L. J. Blakeman of Chicago, who have spent many summers in this locality, are completing a fine modern log cabin style home at Bluff Lake. The home which promises to be one of the show places of the region, was designed by Mrs. Blakeman. A. Sippers & Co. of Chicago are the contracting builders.

Dr. John Turner Dead; Hold Last Rites Here

Word was wired here yesterday of the death of Dr. John Turner who spent his boyhood and began his practice in Antioch. He died at Norwood, Ohio, and his body will arrive here Friday night for burial in one of the local cemeteries. Dr. Turner is a relative of the Chin family.

ANTIOCH, ILLINOIS, THURSDAY, JUNE 20, 1935

STATE SOLONS PASS OLD AGE PENSION, 49-2

Approve \$5,000,000 Fund for Dollar-a-Day Grant

Springfield, June 19—(Special to Antioch News)—Following the passage of the old age pension bill by Congress today which provides for the Federal government to match state pensions up to \$15 a month, the Illinois Senate passed an old age pension bill today providing a grant of \$1 a day.

The state senate, by a vote of 49 to 2, approved an appropriation of \$5,000,000 for the pension; but no specific taxes were provided for it in the bill. If approved by the House and not vetoed by Gov. Henry Horner, the pension plan will become effective next Jan. 1.

The overwhelming number of proponents confidently asserted that the \$5,000,000 would be taken out of general revenue without necessitating new taxes or burdening present governmental activities depending on funds from which the appropriation will be taken.

Senators James J. Barbour, Evanston Republican, and Louis O. Williams, Clinton Democrat, were the only dissenters, claiming the appropriation "as dangerous to too haphazard sources of state income."

Barney Trierger, Pioneer Grass Laker, Succumbs

Barney Trierger, 65, passed away at his Grass Lake home Saturday after a lingering illness.

Last rites were held at the home Tuesday afternoon by Rev. Loyal V. Siller of the Antioch Methodist Episcopal church and Rev. Philip Bohl of DePaulines assisted by the Masonic quarter of the Sequoit Lodge, No. 827. Interment was in Grass Lake cemetery.

Mr. Trierger, who was born on Aug. 18, 1870, at Machteburg, Germany, resided at Grass Lake since he was twelve years old, marrying Bessie Ann Darby at Millburn on Nov. 14, 1895. He was a member of Sequoit Lodge, the Order of the Eastern Star, and the Modern Woodmen of America.

He was survived by his widow, Bessie; two sons, Lester of Chicago, and Arthur, who is a rural route mail carrier from the Antioch postoffice; a daughter, Mrs. D. E. Nugent of Chicago; and three grandchildren, Ralph Trierger, and Eugene and Bernard Nugent.

Insurance Company Will Amend By-Laws

The Millburn Insurance Company has called a special meeting to be held in Masonic Hall at Millburn Saturday, June 29, at 1:30 o'clock for the purpose of amending the by-laws to permit water heaters in milk rooms. The change is made necessary because of the provisions of the new Chicago milk ordinance. Secretary J. S. Deuman explained. With the passing of the amendment which will become effective at once, all farmer members of the company will be enabled to meet the requirements of the milk ordinance without violating any of the provisions of their policies.

Safety Council Asks Safe and Sane Fourth

(Special to The Antioch News)

Chicago, June 20—in carrying out your Fourth of July plans it is well to heed the following pertinent suggestions offered by the National Safety Council:

1. Plan your auto trip carefully. Start early and avoid the rush hours. Watch out for hikers and picnickers. Don't drive when too tired. Don't mix drinking with driving.

2. Don't run unnecessary risks while swimming. Don't dive in shallow water. Don't go beyond your depth. Don't go in the water too soon after a meal.

3. Don't celebrate with fireworks and firecrackers; watch your community celebration instead. Don't fool with firearms. Just remember that motor vehicle accidents, drownings and fireworks are always three major causes of accidents on the Fourth, and that your chances of getting hurt on Independence Day are greater than on any other day of the year.

Hot words prevent cool judgment.

Federal Leader

WOMEN REALIZE VALUE OF HOME, SPEAKER SAYS

Mrs. Novotny, FHA Representative, Outlines Plan for Housing Campaign

Declaring that women, more than men, realize the value of a thoroughly efficient up-to-date home, Mrs. Irene DeHaven Novotny, field representative of the Illinois northern district of the Federal Housing Administration, urged Antioch women to help themselves by investigating the true meaning behind the Better Housing campaign.

About 75 women braved the rainy weather to hear the noted speaker at the Federal Housing exhibit in the Naber building Wednesday afternoon when plans by the women's committee were formulated for their part in putting over the local campaign.

Invest In Health.

"The home represents an investment in health and happiness which cannot be duplicated," Mrs. Novotny declared. "Secretly, many women have been distressed to see their homes lacking the most essential necessities to keep them up. There are a thousand and one things which need doing, but which many housewives have not been able to take care of."

"None of us interested in preserving and protecting homes, and all they stand for, can overlook this problem—and I am not implying that American women are neglectful of their homes. Cautious incomes and tightened credit have caused repairs to go unheeded."

Explain FHA Meaning.

The speaker explained that the Federal government, recognizing these financial difficulties, has insured loans made by approved financial institutions to property owners, banks and other lending agencies through provisions in the National Housing Act.

After answering many questions regarding titles 1 and 2 of the Act, Mrs. Novotny met with the women's committee for their "Info" drive, tentatively set for the first week of July. Members of the committee are: Chairman, Mrs. W. W. Warriner; Mrs. H. J. Vos; Mrs. Hugo Michell; Mrs. George Anzinger; Mrs. Percy Chan; and Mrs. John Robbins. Following the talk, refreshments were served by the committee members.

The first loan to be approved by the northern Illinois district office of the FHA was in Antioch last week, a report of Percy Wilson, regional director. Several financial institutions, familiar with the usually prosperous area of Antioch and the surrounding neighborhood, are anxious to consummate loans here.

WATERWAYS GROUP SEEKS NEW SURVEY OF LAKES REGION

Want Federal Appropriation to Improve Fox River Territory

Persistent in an attempt to secure an appropriation for improvements to the Fox River and the Lakes region surrounding Antioch, members of the Waterways Improvement Association of northern Illinois were encouraged by a report from Congressman Ralph Church that an attempt will be made by him to have a board of army engineers resurvey the district.

The army engineers previously reported that their survey showed that improvements of the Lakes region was not advisable at this time. However, the report was made prior to the drought period last year and the necessity of flood control brought about by excessive rainfall this year.

Reported at 71st Congress.

According to the engineers' recommendation at the second session of the 71st Congress, "no improvement of this stream for navigation in connection with power development, flood control, or irrigation, or any combination thereto, is justified at the present time."

However, since this report, the Waterways Improvement group, through its president, John R. Dousen of Fox Lake, has been attempting to obtain state funds for improving navigation on inland lakes.

Let \$500,000 in Jobs.

Robert Kinney, director of the public works and buildings of Illinois has forwarded to Public Works Administrator Harry L. Hopkins a report listing \$500,000 in improvements to the Fox river and Lakes region chain.

Kinney, in informing Congressman Church of this report, said: "The items listed are those which in our judgment should be done in the interest of flood prevention and the development of the Fox river as a recreation area. We are applying for the establishment of a Civilian Conservation camp on Grass Lake."

Probate Judge Allows Village \$6,020 Claim Against Webb Estate

A claim of \$6,020.28 by the village of Antioch against the estate of Chase Webb was allowed by Probate Judge Martin C. Decker last week in connection with the accounts of former Village Treasurer James Dunn.

Dunn, who completed his term as village treasurer of Antioch on May 1, 1933, turned over his accounts of the village in good condition. However, his accounts showed that the village had money in the Antioch State Bank at the time of the national bank moratorium in 1933. Of the amount on deposit, the bondsmen, J. Ernest Brock and the late Mr. Wohl, waived one-half.

According to the terms of the surety, each of the bondsmen is liable for the full amount, the court records disclose.

College Boys Enter U. S. Military Camps

Robert Hughes and John Brogan of Antioch, juniors this year at the University of Illinois, who spent a few days here last week with their parents following the close of school, have entered U. S. Military camps for a six weeks training course. Robert at Camp Custer, Michigan, for the officers' training course, and John at Camp McCoy at Sparta, Wis., with field artillery.

HEART ATTACK TAKES CHICAGO UNION BOSS AT LAKE CATHERINE

Over-exertion resulting in a heart attack proved fatal to Alphonso Cress of Chicago while working on his summer home at Lake Catherine Sunday, according to an inquest held the same day in Strang's funeral home. The deceased was district manager of the Chicago apartment janitors' union, Local No. 1, and had been a regular visitor in the Lakes region for many years. He is survived by his widow and three sons.

Mr. and Mrs. Cress, arriving at the lake Saturday, proceeded with the strenuous work of removing winter traces from their summer home. The exertion caused a heart attack about noon Sunday. Dr. David N. Deering was called and an inhalator, operated by the Antioch Fire Department's first aid squad, was applied without success. Death was due to coronary thrombosis.

Ray Modernizes Guessing Game to Promote Business

B. A. Ray, proprietor of the service station at 945 Main st., is putting that accumulation of empty motor oil cans heaped beside his driveway to work. The idea is reminiscent of childhood days when the kids attempted to estimate the total number of navy beans in a glass jar. Ray's contest, which closes Labor Day (Sept. 2), dares folks to estimate the total number of oil cans in that pile.

For the most correct estimate, Ray will donate five gallons of motor oil; 20 gallons of gasoline for second; and 10 gallons of gasoline for third place.

Harry Pease, son of Mr. and Mrs. Adolf Pease, has the chickaboox.

Much worth little boasting.

TIDE RISING AGAINST BUREAUCRACY

There is a very healthy indication of serious thinking by our people who wish to maintain constitutional ideas of government and drop socializing plans patterned along European lines, which force the citizen to exist for the State rather than the State to exist for the citizen.

The gradual swing back toward constitutional safeguards is not a political issue; it indicates a desire of citizens to maintain liberty of thought and action, freedom of speech and of the press, and to preserve private enterprise and individual property rights which extension of bureaucracy would destroy under a centralized state.

LIP SERVICE NOT ENOUGH

"Just because there is an opportunity to improve the marketing situation through cooperative organization, does not, in itself, mean that the goal will be realized by and through a cooperative," said Dean Christenson of the Wisconsin College of Agriculture, recently. "It will not be realized unless and until farmers learn to work together in the carrying out of some of the functions of marketing and distributing in which they have a common interest."

You can't pull a rabbit out of a hat unless you have a rabbit to start with—and the farmer who expects a cooperative institution to make something out of nothing is doomed to disappointment. There are two kinds of farm members of co-ops. One pays his dues, attends an occasional meeting, listens to the speeches, and goes home and forgets all about it until next time. Consciously or not, he expects the cooperative management to find a more profitable market for his products without any aid from him.

The other kind of farmer really works with and for his cooperative. He learns the lesson that agricultural experts offer. He enlists the support of neighboring farmers. He thrashes out ideas with his fellow cooperators—and if ninety-nine out of a hundred of those ideas are impractical, the hundredth is likely to be of real value. That is the kind of farmer who is making possible the great progress of our leading cooperatives.

TAXES MULTIPLY LIKE RATS

Government spokesmen, admitting that the national debt will shortly reach the 35-billion-dollar point if the present rate of expenditure is continued, often attempt to laugh this off with the observation that a country as rich as ours can stand almost anything in the way of a debt burden. Also they say that we are

not yet as deeply in debt as a great many European countries. Why should we be? Would that be any honor? Do we want our nation infested with taxes like a rotting ship is infested with rats?

At the present time, federal expenditures are outrunning federal receipts about two to one. In other words, if we spend \$2,000,000,000, half of that is met through existing taxes. The other half must be added to the debt—where it inevitably creates permanent interest charges and new taxes.

The tax burden goes up automatically as public debts increase, just as rats multiply and consume everything around them if they are not exterminated. It is an intolerable drain on individuals and industry. Money that would go for budding factories—for home improvement and construction—for jobs and payrolls—for industrial expansion—for farms—for everything that we use for profit and pleasure, is going to the tax collector. Our productive wealth is being sapped to a constantly increasing extent.

Debts make taxes—taxes make debts. They constitute a vicious circle, that threatens the very existence of our social and corporate structure. A tax-infested nation, like a rat-infested ship, is doomed unless fumigating measures are adopted.

THE AMERICAN WORKER

A fair deal for labor has always been a cardinal principle in this country.

Temporary economic upheavals should not blind us to the fact that the wages, working conditions and living standards of American workmen, skilled and unskilled, are by far the best in the world.

The labor leader who attempts to stir up dissension in time of crisis, and make impossible demands upon industry, is the honest worker's worst enemy.

A good example of that is provided by a large metal mining company which, like all such concerns, is finding the sledding hard these days. About ten per cent of the company's workers belong to a union whose leaders attempted to call a strike which might have deprived the other ninety per cent of their jobs. The union demanded that the company grant a six-hour day, a thirty-hour week, the closed shop, a minimum wage of \$1.00 per hour for underground workers, and similar things which, in view of condition, would have bankrupted the company.

Fortunately the strike call failed to carry by a single vote. Had but one man thrown his influence the other way, hundreds of men would now be out of work, because a handful of arrogant labor "leaders" wanted to show their authority.

American industry is doing its best to provide new jobs, pay fair wages and provide the best possible working conditions. The great bulk of workers know, and appreciate that and they will do well to beware of the agitator who, like the crooked politician or employer, seeks only his own profit.

"No matter how desirable public officials may think it is for the Federal government to project itself into the affairs of our citizens, it can do so only to the extent authorized by the Constitution."—Federal Judge Charles L. Dawson.

-- THIS WEEK IN WASHINGTON --

As this session of Congress continues on into the hot days of June one can note a growing weariness among the Members of Congress, their secretaries and the clerks of committees. The pressure of long hours in the preparation and study of legislation as well as handling of departmental matters, is beginning to unravel the nerves of those connected with the legislative branch of the government. One is asking the other the invariable unanswerable questions as to when Congress will adjourn.

The most interesting event of the week was the 15½ hour filibuster by Senator Huey P. Long, Democrat, of Louisiana, in a futile attempt to prevent the enactment of the resolution permitting the continuation of the NRA in a skeletonized form. He pressed for the passage of the amendment proposed by Senator Thomas P. Gore, Democrat, of Oklahoma, to the effect that all appointments to positions in the new NRA which paid \$1,000 or more a year must be confirmed by the Senate.

Shortly after the Senate met at noon on Wednesday Senator Long obtained the floor and began his speech which lasted until about 4:30 the following morning. His only relief from continual talking came from two quorum calls of about 10 minutes each and the questions propounded to him from time to time by Senators who sought to afford him a "rest." In order to retain the floor Senator Long could yield only for a question from another Senator or for a parliamentary inquiry addressed to the chair. Senator Pat McCarran, Democrat, of Nevada, would repeatedly ask long and rather involved questions of the Senator from Louisiana. Promptly some Senator, anxious to break the filibuster, would rise to a point of order that McCarran was not really asking a question.

Senator Long discussed everything imaginable. His speech included such things as "how to make Roquefort cheese, a salad dressing and 'pot-licker,'" "how to kill a chicken, rob a guinea and hew a nest." To give him ideas a friendly Senator would propose a question, possibly making inquiry as to what he thought about a recent announcement by the President or Postmaster General Farley. While the question was being asked Senator Long would eat a small bit of a sandwich brought to his desk or drink from one of the several glasses of milk he consumed in the course of the filibuster. Finally, by force of sheer physical exhaustion, at about 4:30 a. m., he yielded the floor to Senator Thomas D. Schall, Republican, of Minnesota, and two hours

TREVOR

Mrs. Philip Lavezinski and daughters were Kenosha shoppers Tuesday. William Smith and Arthur Kuriel, Dousman, Wis., called at the Mrs. Mattie Copper home Tuesday.

Donald McKay and aunt, Mrs. Daisy Hallock, Chicago, called on the former's uncle, D. A. McKay and family Tuesday.

Mrs. Susan Carroll entertained a sister from Plano, Ill., on Tuesday and Wednesday.

Ray Patrick, Salem, is making an indefinite stay with his grandmother, Mrs. Luannah Patrick and uncle, Milton Patrick.

Mrs. Susan Carroll has moved into the Elbert Kennedy home recently vacated by Mr. and Mrs. Charley Hazelton.

Mr. and Mrs. Joseph Letzer, Chicago, who are spending the week at their cottage (Diana Lodge) Camp Lake, called at the Charles Oetting home Tuesday.

Mrs. Hans Dietrich and Mrs. Tillie Karrow, Twin Lakes, visited the former's sister, Mrs. Harold Mickle, on Tuesday.

Mrs. Pauline Schafer, Kenosha, and brother near Bristol, spent Thursday and Friday with their brother, Chris Schafer and family.

Mr. and Mrs. D. A. McKay and niece, Miss Ruth Thornton, called on friends in Oak Park Thursday.

Mrs. Joseph Smith accompanied her niece, Mrs. Irving Elms, to Waupaca Friday where they called on Mrs. A. Dibble at the sanitarium.

Frank Moran is still in a serious condition at the Kenosha hospital.

Mr. and Mrs. Kermit Schreck received word of the death of Mrs. Oswald at Forest Park on Saturday. Mrs. Oswald was known in Trevor by her frequent visits to her daughter, Mrs. Fred Schreck.

A number from Trevor attended the marriage service of Illoha Jodele and Arthur Flegel at Wilmot Lutheran church on Saturday afternoon.

The Longman reunion was held at the Willis Sheen home on Sunday.

Miss Ella Kelly, Cleveland, Ohio, is spending this week with her sister, Mrs. Anna Mizzen and family.

Mr. and Mrs. Albert Mutz, son, Albert and daughter, Katherine, Chicago, spent Saturday evening and Sunday with the former's sister, Mrs. Pete Schumacher and family.

Mr. and Mrs. Frank Runyard, daughter, Dorothy, and son, James, and family, Channel Lake, were Sunday dinner guests of their daughter and son-in-law, Mr. and Mrs. Harold Mickle.

Mrs. Lena Holmes, daughter, Janet, and son, John, Chicago, spent the week-end with her sister, Mrs. Daniel Longman and family and also attended the Longman reunion.

Johnnie Blair, Chicago, spent the week-end with Karl Oetting.

Mr. and Mrs. Charles Miller and

Yesterdays

Forty Years Ago

Barney Trierer returned Saturday from Chicago where he went to dispose of a heavy team of horses and brought back with him a diminutive, denuo looking, long-eared donkey. The mares will be kept for the children who frequent Lotus summer resort.

June Wedding

A very pleasant wedding occurred at the home of Mrs. Anna Drom, on Saturday, June 2, 1895, the contracting parties being her only daughter, Susie L. and Albert E. Briden of Chicago. The ceremony was performed by Rev. Clarence Abel. The bride was attended by Miss Alice Briden, sister of the groom, while Wallace Drom, brother of the bride, acted as best man. After the ceremony consisting of the immediate relatives of the contracting parties, sat down to a wedding feast, to which all did ample justice.

The direct loss of \$30 to \$40 that roosters cause the farmer through fertile eggs that spoil does not include the loss of feed used in producing the spoiled eggs, Alp said. Altogether it is estimated that roosters cause a loss of about \$5,000,000 to Illinois farmers each year.

Where egg buyers candle and grade eggs, the loss is direct, since spoiled eggs are culled out before the dealer makes the purchase. While grading and candling is not practiced by a large percentage of dealers, those who buy on the counter are forced to pay a smaller price, thus causing an indirect loss to the farmer. This is well illustrated by the fact that several Illinois poultrymen were able to get 29¢ cents a dozen for graded eggs on a New York market, while their local "run of the flock" price was 19 cents. The spread between graded and counter-basis prices is growing wider as the weather becomes warmer.

Roosters are necessary during the breeding season when eggs must be fertile to hatch, but at other times of the year should be sold or confined, Alp said. Especially desirable birds or young cockerels may be held over if they are kept away from the laying flock.

As eggs and feed prices go to higher levels, the loss from fertile eggs becomes greater. However, the secret of the highest cash income from eggs at any price lies in good breeding, proper feeding, better housing and the production of fertile eggs which are much less likely to spoil.

Twenty Years Ago

Oliver Mathews was in Chicago on business Tuesday.

Ernest Horion and family have moved to the Thayer house, recently vacated by George Conard.

Dr. M. A. Hulett will leave on Friday of this week for Ulithi, Micronesia, where he expects to locate. Dr. Hulett has made many friends while he has practiced here who will regret his decision to locate elsewhere, but wish him success in his new location.

Last week H. A. Hudtke installed a complete set of new furnishings in his barber shop on Main street. The new mirrors in settings of white marble, the new chairs with frame work of white goes to further emphasize the immaculate appearance of the place, and a more sanitary and inviting place, of this kind would be hard to find in towns many times the size of our town.

Mrs. Bacon is entertaining her cousin.

A new barn was raised on the M. Burke farm Monday, which is a great improvement over the one which it replaces.

Ten Years Ago

Mr. and Mrs. C. L. Kull left for Urbana Thursday morning. After attending the live stock judging contest, Mr. Kull is to attend the summer conference of Vocational Agriculture Teachers and the open house at the College of Agriculture.

Mrs. Olive Message has returned to her home after spending two weeks with her sister at Cicero, Illinois.

Mrs. Lucinda Cribb is visiting at the home of Mr. and Mrs. Trierer at Norwood Park.

On Tuesday evening about twenty-five friends from Burlington arrived at the home of Mr. and Mrs. Hebert Voss to help celebrate their tenth wedding anniversary. A beautiful wedding cake accompanied the supper which was served, and many beautiful gifts were received. A good time was enjoyed by all.

The Word "Cheese"

When you read the Scriptures and the word "Cheese," it's strictly a dairy term and means "thick milk." It may stand for butter, cheese, or a mixture.

Largest Balanced Rock

Nature Magazine says Miracolo rock is believed to be the largest of the kind in the world. It is near Grand Junction, Colo. The rock is sixty feet high, weighs 12,000 tons, and is balanced on a base only three feet thick.

daughters, Chicago, spent the week-end with Mrs. Miller's sister, Miss Mary Sheen. On Sunday in company with Miss Sheen they called on their sister, Mrs. George Vincent and family near Gona City.

Donald Hopkins and Reuben Schaefer, near Bristol, and Vernon Higgins, Pleasant Prairie, were Sunday callers at the Chris Schafer home Sunday.

Charley Oetting was busily at work in Chicago Monday.

Herman Oetting, Jr., with friends, Berwyn, Ill., called on his uncle, Charley Oetting and family Sunday.

WILMOT

Mr. and Mrs. Paul Voss and children, Avie and Darwin, were Sunday dinner guests of Mr. and Mrs. Wm. Elfers at Richmond on Sunday to celebrate Father's day.

Howard Zoerl and daughter, Ruth Helen, of Milwaukee, were guests at the Runkel home on Sunday.

Mr. and Mrs. Charles Kanis, Esther Viola and Warren Kanis returned from a motor trip to Algoma on Thursday.

Alfred Heynolds was a Sunday guest of Mr. and Mrs. Winn Peterson at Konosha.

Mr. and Mrs. Ralph Marzahl, of Hebron, (Alta Voss) announce the birth of a daughter, Nancy June, at Hebron on June 15.

Mr. and Mrs. William Anderson and daughter of Genoa City spent Sunday with Mr. and Mrs. Raymond Randolph.

Funeral services for Clarence White of Twin Lakes were conducted by Rev. E. Kistler at the M. E. church Monday afternoon. Burial was in the Wilmet cemetery. Commander Frank Christian and a firing squad from the Burlington Legion Post assisted at the burial services and the squad fired a salute at the grave. Members of the Wilmet Fred Semrau Post acted as pall bearers and color bearers.

The Larmer Undertaking Company of Antioch has established a branch office with Kenneth Long at the Wilmet Photo Shop.

Mr. and Mrs. Geo. W. Lewis, Billy and Laura Lee Lewis, of Milwaukee, were guests on Sunday of Mrs. Florence Lewis and Mr. and Mrs. Frank Burroughs.

Mrs. L. Boulden, Mr. and Mrs. Harold Boulden and children, Burlington, and Maxine Sawtelle, of Burlington, were Sunday guests of Mrs. H. Boulden and family. Friday they entertained Mr. and Mrs. John Sibley, Nason Sibley and daughter, Mary Lou, and Mrs. H. Sponholz from Antioch.

Helen Loftus returned home Sunday from the Wisconsin University where she was a student the past year. At a meeting at the High School on Thursday evening, Marlin M. Schnurr was elected chairman, Roland Holegan and John Sutcliffe as other members of a committee to act on building sidewalks with the assistance of the FEIA in Wilmet.

Members of the Wilmet Ladies M. E. Aid were represented at a Parish party for the Greater Parish Aid at Salem on Thursday afternoon.

Cora Tyler, accompanied by Grace Carey, went to Chicago on Friday where she left for Quincy. Miss Carey was an overnight guest of Mr. and Mrs. J. A. Nolan at Oak Park.

There was a meeting of the Ladies of the Holy Name parish at the home of Mrs. Warren Sarbacker at Silver Lake Tuesday evening to plan activities during the summer months for the parish.

The Children's Day exercises at the M. E. church were well attended on Sunday evening.

Sunday guests of Mr. and Mrs. David Kimball were Mr. and Mrs. Wm. Kimball and Mr. and Mrs. Max Miller of Genoa City.

Rev. John Finan is to attend the first mass of Rev. Joseph Steigert at Paris on Thursday morning.

Mr. and Mrs. Walter Carey and daughter, Nancy, of McHenry were dinner guests Sunday at the Carey home to see their son, Dick, who is recovering from a tonsil operation.

Jedele-Fiegel.

One of the prettiest weddings which has ever been held in Wilmet took place Saturday afternoon at four o'clock in the Peace Lutheran Church when the Rev. S. Jedele, pastor there for more than thirty years, read the service for nuptials uniting his daughter, Miss Rhoda Jedele, and Arthur W. Fiegel, Beaver Dam, Wis. The bridegroom is the son of Mr. and Mrs. Otto Fiegel of Silver Lake.

One hundred guests were entertained at a dinner and reception afterwards in the parish hall. Eighteen women of the congregation were in charge of the preparation and serving of the dinner, contributing their all as a token of esteem for the bride who has been active in work of the parish for a number of years, as organist, Sunday school teacher and as a leader in various groups. Immediately after the reception Mr. and Mrs. Fiegel left on a two weeks' trip through the eastern states.

Both the bride and bridegroom attended the high school at Wilmet. The former Miss Jedele is a graduate of the Racine-Kenosha Rural Normal school and for the past five years was principal of the Channah Lake, Ill., grade school. Mr. Fiegel was graduated from Milwaukee State Teachers College where he was a member of Beta Phi Theta fraternity, and was principal of the Hanan school, Pleasant Prairie township, for seven and a half years.

Milatz-Fonk.

Uniting in marriage Miss Alvina Martha Milatz, daughter of Mr. and Mrs. Fred Milatz, Burlington, and Milton J. Fonk, son of Mr. and Mrs. M. J. Fonk, Konosha, was a ceremony held in the parsonage of the Holy Name church in Wilmet Saturday morning at 10 o'clock, with the Rev. John Finan officiating.

Mr. and Mrs. Fonk have left on a short wedding trip through the northern part of the state and on their return will make their home at 3213 Roosevelt road.

Animals Mammal Sentinals
There are only two animals which maintain sentinels at all times, like Indian tribes did long ago. These two are the Rocky Mountain sheep and the elk.

BELGIAN CONGO IS RICH IN RESOURCES

Tremendous Strides Made in March of Progress.

Washington—News dispatches, reporting the tragic death of six men and a woman in an airplane crash in the Congo jungles, recently drew attention to this huge colonial outpost of Belgium in the heart of Africa. Although the plane was reported "lost" in a vast wilderness, only a short time elapsed before it was found, indicating that even the once primitive western borderland near the Congo river is not as far removed from the influences of civilization as it was only a few years ago.

"Many places in the Congo where the bellow of the elephant, the thrashing of the hippopotamus and crocodile, and the shriek of the chimpanzee alone disturbed aborigines, now echo to the blasts of steamboat and locomotive whistles, the drone of automobile and airplane motors, and the buzz of machinery in palm oil factories," says the National Geographic society. "The half century since the inspiring explorations of Livingston and Stanley has witnessed tremendous strides in the march of Congo progress.

"The new king of Belgium, Leopold III, rules the colony, annexed by his grandfather in 1908. Having visited there twice as a prince, he is familiar with, and vitally interested in, its economic and commercial problems. Nearly 90 times as large as the mother country, and a third as large as the United States, Belgian Congo is populated by approximately 18,000 white men and more than 9,000,000 natives.

Climate Hinders.

"Perhaps the greatest stumbling block to progress has been the climate. The temperature, remaining always close to 80 degrees, is accompanied by extreme humidity. In the spring, Belgian Congo prepares for one of its two seasons of heaviest rainfall. The other is in October, when the sun again moves across the Equator. But in spite of climatic hazards, the tramp-tramp of western progress has surged forward.

"The dark cloud of depression that has hung over the world shone at least one silver lining as it passed over the Congo. During prosperous days, the development of agriculture was side-tracked in favor of mining. With the advent of economic distress, the government has been encouraged by a return to the soil movement that has seen cotton, coffee, and rice pass from experimental to staple production.

"Palm growing is an important industry. Its nut-oil and kernel products are a dependable source of income—the United States being the best customer.

"Two-thirds of the colony's wealth is in minerals, copper being the most important. More than 3,000,000 carats of diamonds were mined in 1932. Gold, radium, and tin also rank high as revenue sources, but Congo coal is inferior, being almost worthless for industrial uses.

"Despite the recent unstable condition of world markets, it is an interesting fact that dealers in American-made automobiles found business quite good in the Belgian Congo. Belgium has continued a policy of building good roads into remote districts of its African colony. Some 24,000 miles of highway have been laid, supplementing 2,700 miles of railroad.

Great Trade Artery.

"The great trade artery of the colony, however, is the Congo river. Ninety-five miles above its mouth, at Matadi, several rapids hamper steamers. A railroad line links Matadi with Leopoldville, the capital, busy doorway to the interior. Here again the Congo becomes navigable for 1,003 miles to Coquimboville, Stanleyville, and Stanley falls.

"Above Stanley falls the Congo becomes the Lualaba river, navigable for 985 miles, heading toward the southeastern town of Katanga via Ponthieville, Kindu, Kongo, and Kabalo.

Many of these important villages, as well as Bandundu, Port Francq, Luebo, Boma (at the mouth of the Congo), Luanga, Basankusu, Lissala, and Basoko are served by air routes.

The southern part of Belgian Congo is linked by railway with the Union of South Africa and the Portuguese colony of Angola.

"The present colonial government encourages all efforts to educate its native subjects. The burden of instruction is carried mainly by missionary workers, both Catholic and Protestant.

"Government subsidies have been granted, in some instances, in order that their work might proceed. French is taught as soon as native pupils are able to learn the language. Instruction in agriculture, carpentry, and metal working is offered in several schools."

Oregon Woman, Aged 80, Seeks Angler's License

Eugene, Ore.—Mrs. Nancy Burge of Cottage Grove may be eighty years old, but she's going fishing this spring.

Mrs. Burge wrote the Lane county court here asking if she were eligible for a free fishing license. The state grants free licenses to persons who have lived in Oregon more than 60 years. Mrs. Burge did not furnish that information, but County Commissioner Cal Young said she would get the license even if he and the other commissioners had to buy it. "If any woman of eighty still enjoys fishing, she should be able to fish," Young said.

She Runs a Home, Rears a Family, Writes and Acts on Air Program

1. Mrs. Gertrude Berg, author-actress, in the kitchen of her New York City apartment. 2. In action at the microphone playing a role of her own writing. 3. As the hostess of her charming home. 4. With her children, Robert Cherney, 12, and Harriet, 9.

GOING around the clock with **GOING** of her program demands much of her time. Mrs. Berg is known at home as a charming hostess and intelligent mother-type whose **GOING** hold special charm for her.

Helping the cook is one of her hobbies, and frequently she prepares dinner for the entire family of four, and still manages to find playful pastime in between with her two youngsters, Cherney, 12, and Harriet, 9. In addition to these activities, Mrs. Berg is an accomplished pianist, water-color painter and is fond of giving free lectures for worthy causes. She rose to fame as the author of "The Goldbergs."

Though the writing and produc-

Parrotman Changes Color
The parrotman is a bird which changes color according to its background, on a glacier, living on insects, it is as white as snow. When the parrotman goes to the shore of one of the higher lakes, it turns the color of the gravel along the shore. It dwells in the high altitudes, usually around glaciers.

Transvaal Gold Producer
The Transvaal province of the Union of South Africa is by far the greatest producer of gold, producing nearly half the world's supply. It contains the Witwatersrand gold mines, the richest in the world, in an area about 30 miles long and 5 miles wide, around Johannesburg.

ZENZAL STOPS ITCHY RASH IN THREE MINUTES
Don't suffer the torture and torment of a burning and itchy skin any longer. Just step into Reeves' drug store and say ZENZAL. Take it home and apply as directed. Then watch the clock. If ZENZAL doesn't stop that itching and burning in three minutes, bring the tube or jar back and get your money.

Cause of Ice Sheet Unsolved
The cause of glaciation in North America and in other parts of the world is still one of the unsolved problems of science. Several theories have been suggested, but none has been generally accepted.

Blind Graduates Successful
Approximately 65 per cent of all graduates of the Ohio State School for the Blind are self-supporting through their ability to follow the trades in which they were instructed while in school.

Please now attend the service.

CHRISTIAN SCIENCE CHURCHES

"God the Preserver of Man" was

the subject of the Lesson-Sermon in

all Churches of Christ, Scientist, on

Sunday, June 10.

The Golden Text was, "The Lord

giveth wisdom . . . Ife keepeth the

path of judgment, and preserveth

the way of his saints" (Proverbs

2:8).

Among the citations which com-

prised the Lesson-Sermon was the

following from the Bible: "The Lord

upheld all that fall; and raiseth

up all those that be bowed down.

He will fulfill the desire of them

that fear him; he also will hear

their cry, and will save them. The

Lord preserveth all them that love

him" (Psalms 145:14, 19, 20).

The Lesson-Sermon also in-

cluded the following passages from

the Christian Science textbook,

"Science and Health with Key to the

Scriptures," by Mary Baker Eddy:

"The divine Mind that made man

moldable His own image and like-

ness . . . All that really exists is the

divine Mind and its idea, and in this

Mind the entire being is found har-

monious and eternal. The straight-

and narrow way is to see and ac-

knowledge this fact, yield to this

power, and follow the leadings of

truth" (p. 131).

In Honor of Flag Day

(Written for last week)

The flag of the United States of

America is the symbol of the oneness

of the nation; when a Girl Scout salutes

the flag, she salutes the whole

country.

This year the Antioch Troop of

Girl Scouts will celebrate Flag Day,

June 14, by going on an all day hike

and concluding the day by holding

an investiture ceremony in the woods.

The new scout is Jeanette Whited

and she will have the honor of be-

coming a Girl Scout on Flag Day.

When a girl joins the Scout organiza-

tion she assumes the duty of helping

others to observe Flag Etiquette.

The rules of Flag etiquette based

on honesty and courtesy that all Girl

Scouts must know are as follows:

1. The Flag should not be raised

before sunrise or be allowed to re-

main up after sunset.

2. The Flag should never be used

as drapery in any form whatever; it

should never have an object placed

upon it.

3. An old, torn, or soiled Flag

should not be thrown away but

should be destroyed, preferably by

burning.

4. The law specifically forbids the

use of representation of the Flag in

any manner or in any connection with

the manufacture of goods.

5. The Flag, on being retired or

at any other time, should never be

allowed to touch the ground.

Scout Serbie,

Carolyn Phillips.

Metal for Clock Chimes

High-grade bell metal consists of ap-

proximately 73 parts of the purest cop-

per available and 22 parts of imported

tin. A great many things included in

this bellmaker's art contribute to tonal

qualities. One of these is purity of

metals used—another is method of sus-

pension and, finally, the precision with

which the parts are manufactured and

tuned.

Humanity in Animal's Eyes

There is in every animal's eye a

dim mirage and glint of humanity, a

flash of strange light through which

their life looks out and up to our great

mystery of command over them, and

claims the fellowship of the creature,

if not the soul.—Ruskin.

Great Britain's Lumber

Only between 5 and 6 per cent of the

lumber used in Great Britain is grown

within the borders of that nation.

Personals

AMUSEMENTS

"Public Hero No. 1"
Stars L. Barrymore
In Kenosha Theatre

Modern as today's newspaper headlines, and thrilling as their graphic accounts of the war of the government on organized crime, is "Public Hero Number 1," Metro-Goldwyn-Mayer's amazing thriller of the work of the secret service, starting Saturday at the Kenosha Theatre.

Tracing the pursuit of a notorious public enemy, the work of the operator who turns him up to justice, and the amazing ramifications of the Federal agencies pitted against the underworld, the story tells, in details actually taken from records, cases and newspapers, the ever more apparent fact that crime does not pay.

Lionel Barrymore plays the principal character role, in which he demonstrates an amazing facility for comedy along with drama as the bumbling Dr. Glas, physician-in-ordinary to the cohorts of the underworld. Chester Morris gives what is probably the finest performance of his entire career.

LAKE VILLA

Delbert Sherwood, who is in CCC Camp at Glenview, spent Saturday and Sunday with his mother here.

Mrs. James Williamson and twin sons, Guy and Lawrence, returned Sunday evening from a pleasant automobile trip east. They visited their daughter and sister, Miss Helen Williamson, a nun at Sharon Hill, Pa., for a few days before travelling on to New York and up into Canada, and were gone from home a week.

Mrs. A. Morgan Duke, better remembered as Alene Larson, of Fort Worth, Texas, came last week for a visit with her sister, Mrs. Oscar Douglas and other relatives in Waukegan and other points in the country.

Clyde Holm of Champaign, accompanied by a friend, Miss Hazel Boyd, also of Champaign, spent a few days last week visiting his parents, Mr. and Mrs. George Holm.

Mr. and Mrs. Frank Richards drove to Wheaton last Saturday, and Miss Ruth Gottschalk, who has been with them for a few weeks following the close of school, accompanied them to enter summer school.

Mrs. Arthur Naua of Waukegan was with her daughter, Mrs. Lester Hamlin and family for Saturday and Sunday.

Dr. and Mrs. Yale of Elgin were guests of Mr. and Mrs. H. H. Perry on Sunday.

Mrs. Paul Avery, accompanied by Mrs. Harold Oruce of Grayslake, spent Friday in Chicago.

Mrs. James Leonard, who has been quite ill, is on the mend, and is able to be about the house again.

Miss Ruth Perry of this place and Miss Nellie Stanton of Long Lake entered University of Chicago as students of summer school on Monday morning.

Rev. Do Selma, who has been a student at Garrett Biblical Institute, has completed the course for the summer and will enjoy a vacation with his family at his home for the summer. Instead of the usual four days, he spent two days there this week.

Miss Belle Richards of Antioch spent last Friday with friends here. Mr. and Mrs. C. C. Frye and son spent the greater part of last week with their parents at Mattoon, Ill.

Ben Cribb was in Chicago a few days last week and visited friends there.

Mr. and Mrs. Ed Tieke drove to Chicago on Friday and Marilyn Tieke who had spent the week with her grandmother, returned home. Mrs. Tieke's mother also returned with them to spend a few days.

George Walker, who is an official in the Crown flour mills of Portland, Oregon, came east on business trip, and was able to spend a few days with his brothers, Will and John, and their families here last week, and to call on friends. He made a trip to Milwaukee on Wednesday of last week and his niece, Margaret Walker, and her friend, Jean Perry, accompanied him.

Mrs. Elsa Kalle and small daughter, Constance, of Cleveland, Ohio, are here for a two or three week's visit with her parents, Mr. and Mrs. Carl Seeger and relatives at Kenosha. Her husband accompanied her on the trip and returned home the following day.

Mr. and Mrs. Louis Larson of Union Grove, Wis., visited their daughter, Mrs. Oscar Douglas, a few days last week.

The Juveniles of the R. N. A. camp here took part in a R. N. A. and Juvenile Initiation service in Waukegan on Thursday afternoon of this week, and several of the Royal Neighbors accompanied them.

Camp Hastings, the Irving Park Y. M. C. A. camp near Lake Villa, opened a week ago for the first of the four two week periods, and other sessions will begin on June 30, and every two weeks thereafter up to Aug. 1st.

Boys between the ages of 7 and 15 may register for the entire eight weeks or for one or more of the two week periods. The enrollment for each session will be limited to 100 boys.

Karl Wolfe, boys' work secretary,

in camp director, his staff includes

Norman H. Maglathery, member of

the faculty at J. Sterling Morton High

school and Junior college, athletic

and swimming director; William B.

Ashley, handcraft director and Henry

A. Tendall, who will be in charge of

airplane building classes. Miss Constance E. Roberts, a registered nurse, is in charge of health supervision.

Mrs. N. A. Borg is camp dietitian, and

Mrs. Alice Haraden is head of the

women counselors for the younger

boys' cabins; L. M. Scholp will be

camp counselor. Twenty-eight boys

had already registered at the opening

of the camp.

Not Circulating Library

The Library of Congress is not intended as a lending or circulating library, but as a reference library and permanent store house of human knowledge. Only certain officials at Washington are entitled, by statute, to the privilege of drawing books for home use. Special permits to borrow books are freely issued by the librarian, however, to persons engaged in research, and there is also maintained an interlibrary loan system by which books may be loaned to other libraries for use of those engaged in serious investigation.

The Cherokee Alphabet

The Cherokee alphabet was invented by Sequoyah between 1800 and 1821. It was the product of his contact with white civilization. It was accepted by the Cherokee nation and thousands were soon able to read material prepared in their own language.

GOVERNMENT BANK
UNSUITED TO U.S.

Would Serve Politics Rather Than
Business Needs, Says R. S.
Hecht, Citing Previous
Experiences.

QUOTES PRESIDENT JACKSON

Extent and Diversity of This Country
Presents Different Situation From
Europe and Makes Regional
Banking Necessary.

WASHINGTON, D. C.—A refutation of arguments in favor of a government-owned central bank system for the United States is presented in a statement by R. S. Hecht, President of the American Bankers Association, based on exhaustive studies of European central banks. He also points out the disastrous consequences of previous central bank experiments in the United States.

"Our present regional Federal Reserve System under private ownership is infinitely better for this country, than would be a government-owned and controlled central bank," Mr. Hecht says. "If history teaches us anything, it is that it is almost certain that a central bank so owned would be run to meet the varying exigencies of the government in power rather than to serve the commercial needs of the country."

Central banking has been tried twice in the United States, but was finally abolished because the credit control which the central banks exercised became objectionable and unpopular, he goes on to say.

What Andrew Jackson Said

"The continued existence of the Second Bank finally became a bitter political issue and President Jackson succeeded in abolishing it," Mr. Hecht says. "Permit me to quote from his farewell address: 'The immense capital and peculiar privileges bestowed upon it enabled it to exercise despotic sway over the other banks in every part of the country. From its superior strength it could seriously injure, if not destroy, the business of any of them which might incur its resentment... If you had not conquered, the government would have passed from the hands of the many to the hands of the few; and this organized money power, from its secret conclave, would have dictated the choice of your highest officers... The forms of your government might, for a time, have remained, but its living spirit would have departed from it.'"

When the Wilson Administration considered banking reform it carefully kept away from vesting central banking powers in a single institution and instead introduced the regional idea by creating twelve reserve banks located in different economic and geographical sections of the country. Mr. Hecht says, "Well because the separate banks are under the guidance of men chosen on account of their intimate acquaintance with the problems and needs of their respective territories, he continues:

"The great size and diversity of

America tends to make a central bank undesirable. The central banks of Europe such as the Banks of England, France and Germany, cover areas not as large as some of our states. A central bank in the United States on the other hand would be called upon to administer the financial policies of an area larger than all of Europe in which there are quite a number of central banks."

Subservient to Popular Demands

"Moreover, history has proven that any banking system entirely owned and dominated by the government usually demonstrates much greater ability in aiding expansion of credit than in putting on the brakes at the right time to prevent undue inflation by restraining and contracting credit. This is easy to understand because in times of depression everyone is urging the government to make money and credit easy

and to encourage expansion.

"On the other hand, it always has been and always will be a difficult task for any government to call a halt in time of apparent prosperity because in the very nature of things the government would be very sensitive to public criticism and would hesitate to take any action which would tend to curtail business activity. It is such undue susceptibility to popular demands which makes government banking inherently weak."

"Our studies show that of all the central banks at present existing there are only four whose stock is owned by the government. The newest central bank is that of Canada, which opened its doors only a few months ago after a most exhaustive study had been made of the experience of all nations with the result that the stock of the Bank of Canada is privately owned."

The American Bankers Association, Mr. Hecht says, is convinced that a central bank would not be to the interest of the public or the banks. This position, he added, is well understood by the President and the leaders in his Administration for we have been absolutely frank with them in all of our discussions and have missed no opportunity for emphasizing that in our opinion no banking system will, in the long run, be sound if it is dominated entirely by the ever-changing political administrations. We should do all we can to keep our banking mechanism as far removed from partisanship as possible."

HICKORY

Mr. and Mrs. Hugo Gussarson celebrated their son, Otto's, thirteenth birthday Sunday afternoon with a family gathering at their home. It was also the fourth birthday of his cousin, Dorothy Jean Holtberg from Chicago. Those present were Mr. and Mrs. Allen Holtberg and children, Mr. and Mrs. Louis Milling and family from Chicago, Mr. and Mrs. Otto Olsen, Jr., and Mrs. Petersen from Park Ridge, Mr. and Mrs. Otto Olsen, Sr., from Algonquin and Mr. and Mrs. Larson and Mr. and Mrs. Church from Southside, Chicago.

Mrs. Elton Tillotson and Miss Grace are spending some time in Kenosha.

Paul Nielsen from CCC camp, Milwaukee, was home a few days of last week.

Mrs. Lois Hunter of Oak Park was home over Sunday.

Mr. and Mrs. Leo Thompson of Wheeling visited George A. Thompson Saturday evening.

The Misses Margaret and Thelma Pullen of Antioch visited Saturday at the Curtis Wells home.

Mr. and Mrs. Austin Savage in company with Mr. and Mrs. Kuha of Antioch spent Saturday and Sunday visiting relatives in Apple River and vicinity.

Dr. and Mrs. A. J. Stream of Chicago spent Sunday with the Ed Stream family on the farm.

Mr. and Mrs. Ralph Fields called on Mr. and Mrs. Vessie Dillie at Paducah Lake Sunday afternoon.

Miss Doris Bray of Waukegan spent last week with her grandparents, Mr. and Mrs. Charles Cook.

Miss Marcelline King is working at Lake Marie.

Miss Virginia Weila is working in Waukegan.

Dr. and Mrs. P. M. Jorgenson of Kenosha called at George A. Thompson's Sunday evening.

Harold Thompson, Mr. and Mrs. Will Thompson and Helen spent Monday morning in Kenosha.

Alpacas

Alpacas are not as tall as llamas; they have short legs, rather heavy-looking bodies, two to four feet in height. Body and legs are covered with wool which is often six or eight inches long.

In some species, says the Washington Post, the wool hangs almost to the ground. The alpaca is larger and heavier than the largest dog; its neck is rather long and thick, and when approached by a stranger the beast pricks up his ears and at times splits at the intruder, as do llamas.

and to encourage expansion.

"On the other hand, it always has been and always will be a difficult task for any government to call a halt in time of apparent prosperity because in the very nature of things the government would be very sensitive to public criticism and would hesitate to take any action which would tend to curtail business activity. It is such undue susceptibility to popular demands which makes government banking inherently weak."

"Our studies show that of all the central banks at present existing there are only four whose stock is owned by the government. The newest central bank is that of Canada, which opened its doors only a few months ago after a most exhaustive study had been made of the experience of all nations with the result that the stock of the Bank of Canada is privately owned."

The American Bankers Association, Mr. Hecht says, is convinced that a central bank would not be to the interest of the public or the banks. This position, he added, is well understood by the President and the leaders in his Administration for we have been absolutely frank with them in all of our discussions and have missed no opportunity for emphasizing that in our opinion no banking system will, in the long run, be sound if it is dominated entirely by the ever-changing political administrations. We should do all we can to keep our banking mechanism as far removed from partisanship as possible."

KENOSHA, WIS.

MILLBURN

Mr. and Mrs. Charles Marshall, Alice Stewart, Margaret McFarland and Merrill Taylor of Chicago were guests for dinner at the J. H. Bonner home Sunday.

Richard Martin and John Edwards drove to Chicago Wednesday evening.

Mrs. J. Kalut spent a few days with Mrs. Elvin Griffin at Orange Hall.

Mr. and Mrs. A. H. Piersford and daughters, Margaret and Ruth, and Mrs. Bock of Evanston drove to Rochester, Minn., on Tuesday, returning Wednesday.

Mrs. Leidle Bonner and daughter, Beryl returned Sunday morning from a week's visit with relatives in Three Oaks, Michigan. She was accompanied home by her sister and brother-in-law, Mr. and Mrs. Earl Priest, who spent the day at the Victor Strang home.

The Happy Rainbow Workers Club met at the home of their leader, Miss Elsie Behrens, Thursday, June 13th. After spending the afternoon working

on record books and their sowing, all enjoyed a half hour of recreation.

Mrs. J. H. Bonner, Vivien Bonner,

Mrs. W. M. Bonner, Mrs. Lewis Hau-

man and Mrs. Gordon Bonner attend-

ed the lecture on "Foot Defects"

Orthopedic department of the state

given by Dr. Walter Fischer of the

medical staff.

Geraldine Bonner of Champaign

spent the week-end with her parents.

Mr. and Mrs. E. A. Martin and

Richard were dinner guests at the

home of Mrs. Florence Achen in Kenosha on Sunday.

Mrs. Warren Hook entertained the

bridge club at her home Thursday

afternoon.

Robert Bonner, Jr., is spending a

week at the home of his uncle, Floyd

Did You Ever Try These Recipes? Do, Please

Strawberry Mousse.
1 quart strawberries
2 cups cold water and juice
1/2 cup sugar
2 pugs. strawberry Jewel-Jell.
2 cups boiling water
1 pint whipping cream.

Mash berries; drain off juice and add enough water to measure 2 cups; mix sugar with berries and let stand. Dissolve Jewel-Jell in boiling water; add cold liquid and allow to stand until of syrupy consistency. Whip with egg beater, fold in whipped cream and washed strawberries, lengthwise, in a few whole berries for garnish. Pour into mold and set in refrigerator. Unmold on platter; garnish with whipped cream and whole strawberries.

Chicken Salad
1 four lb. chicken
2 cups celery, diced
1 can pens
1 tablespoon minced onion
Salt

Pepper
1 cup mayonnaise
3 hard cooked eggs
Strips of pimento
Capers
Boil chicken until flesh loosens from bone; drain from liquor. Cut from bone; drain from uniform, firm pieces. Mix chicken, celery and minced onion lightly with mayonnaise; season with salt and pepper. Serve in lettuce cups and garnish with capers, strips of pimento and hard cooked egg cut in fourths lengthwise. Serves 12.

Bride's Cake
1 cup butter
2 cups sugar
1/2 teaspoon vanilla
3/4 cup flour
2 teaspoons baking powder
1/2 teaspoon salt
7 eggs whites
1/2 cup milk

Cream butter, slowly work in the sugar, continuing until smooth. Add extract. Sift together flour and baking powder. Add salt to egg whites and beat until stiff. Add flour mixture and milk alternately to the butter and sugar, beating well after each addition. Carefully fold in egg whites. Bake in heart shaped pan in moderate oven (350 F.) for one hour and ice with White Mountain Icing.

White Mountain Icing

1 cup sugar
1/3 cup boiling water
1 teaspoon vanilla extract
1 egg white
Put sugar and water in saucepan, stir until sugar is dissolved, and bring to the boiling point. Beat egg white until stiff and add one tablespoon boiling syrup. Add four more tablespoons syrup, one at a time, continuing the beating. Continue to let syrup boil until it will spin a long thread (four inches) when dropped from tip of spoon; then add to first syrup in a fine stream, beating constantly until of right consistency to spread. Add flavoring and spread on cake.

Plain Icing
3 tablespoons hot milk
1/2 teaspoon butter
1/2 cup confectioner's sugar
1/2 teaspoon flavoring
Add butter to hot milk; add sugar slowly to make right consistency to spread. Add flavoring. Spread on top and sides of groom's cake.

Nicotine in Tobacco
The quantity of nicotine in tobacco varies from 2 to 8 per cent, the coarser kinds containing the larger quantity, while the best cigars seldom contain more than 2 per cent, and often less.

When a battery is charged, chemical energy is stored up. As the energy is discharged it becomes electricity.

OLD ACCOUNTS

The "Bluenoses"
It is supposed that the nickname "bluenose" became associated with the inhabitants of Nova Scotia as the result of a common variety of potato which at one time was exported in large quantities from that province to New England. The Yankees associated the name of the potatoe with the people who raised them. This particular variety of potato, says a writer in the Cleveland Plain Dealer, was popularly called the bluenose, because one end was bluish in color. The Nova Scotians eventually accepted "bluenose" as their favorite nickname.

First Railway Rails
Wooden rails for use in mines were used as early as 1553 on a tramroad near Barnard's Castle, County Durham, England. The first use of iron plates to strengthen the wooden rails was at the Whitehaven collieries, Cumberland, England, in 1753. In 1751, iron plate rails were laid on a wagon way, connecting the Conbrookdale Iron works in Shropshire with additional smelting furnaces at Horsley. The first iron rail over which a train operated by a steam locomotive was on the Stockton & Darlington railway, England. This road was opened September 27, 1825.

Lima on River Rimac
Lima is on the River Rimac and while some of the stone bridges were shaken down in the earthquake there is one still intact which dates from 1610. One ancient feature is gone. The Due de la Plata, who was viceroy from 1681 to 1689, made of Lima a walled city. It was a period of fiery piracy on the seas and the viceroy took this unusual precaution to arm the old capital against raids of the sort in which Sir William Morgan took Panama city. These walls stood until 1870, when they were razed and replaced by boulevards which now ring the city.

Use for Fur of Coyote
The fur of the coyote appears in the fur trade to a considerable extent. The characteristic color of coyote fur is a coarse yellowish gray clouded with black. Inferior furs, like coyotes, are very frequently dyed in imitation of other, more expensive furs.

Islands Leased by U. S.
Great Corn and Little Corn Islands are in the Caribbean sea, east of the Atlantic coast of Nicaragua. Under a treaty proclaimed June 24, 1910, they were leased by the Nicaraguan government to the United States for 99 years.

ADJUDICATION NOTICE
PUBLIC NOTICE is hereby given that the undersigned Administratrix of the Estate of JAMES H. McVEY, deceased, has fixed upon Tuesday, the 3rd day of September A. D. 1935, as the return day for the hearing of all claims against the above named Estate. All persons having claims against said Estate are hereby notified and requested to attend the Probate Court of Lake County, Illinois, on said date at ten o'clock A. M. for the purpose of having said claims adjusted.

EDNA McVEY WARRINER,
Waukegan, Ill., May 23, 1935.
Walter G. French, Attorney.
(44-56)

Warriors Rode on Percherons
Medieval warriors rode into battle on fine Percheron mounts. Not all of them, of course, but those who held or sought the then much disputed region of La Perche in France used them almost exclusively. Percherons were by means a new breed then. Nor does history leave any records of a time when they were not to be found in plentiful numbers in the rich valleys and grassy uplands of this ancient province, the native home of the Percheron.

City Named for Vice President
The only Vice President of the United States to enjoy the distinction of having a large city named in his honor was George Mifflin Dallas, who was President Polk's running mate in 1844. Later he was appointed by President Buchanan to England. He was the able son of an able father, Alexander James Dallas, secretary of the treasury under James Madison—Cincinnati Enquirer.

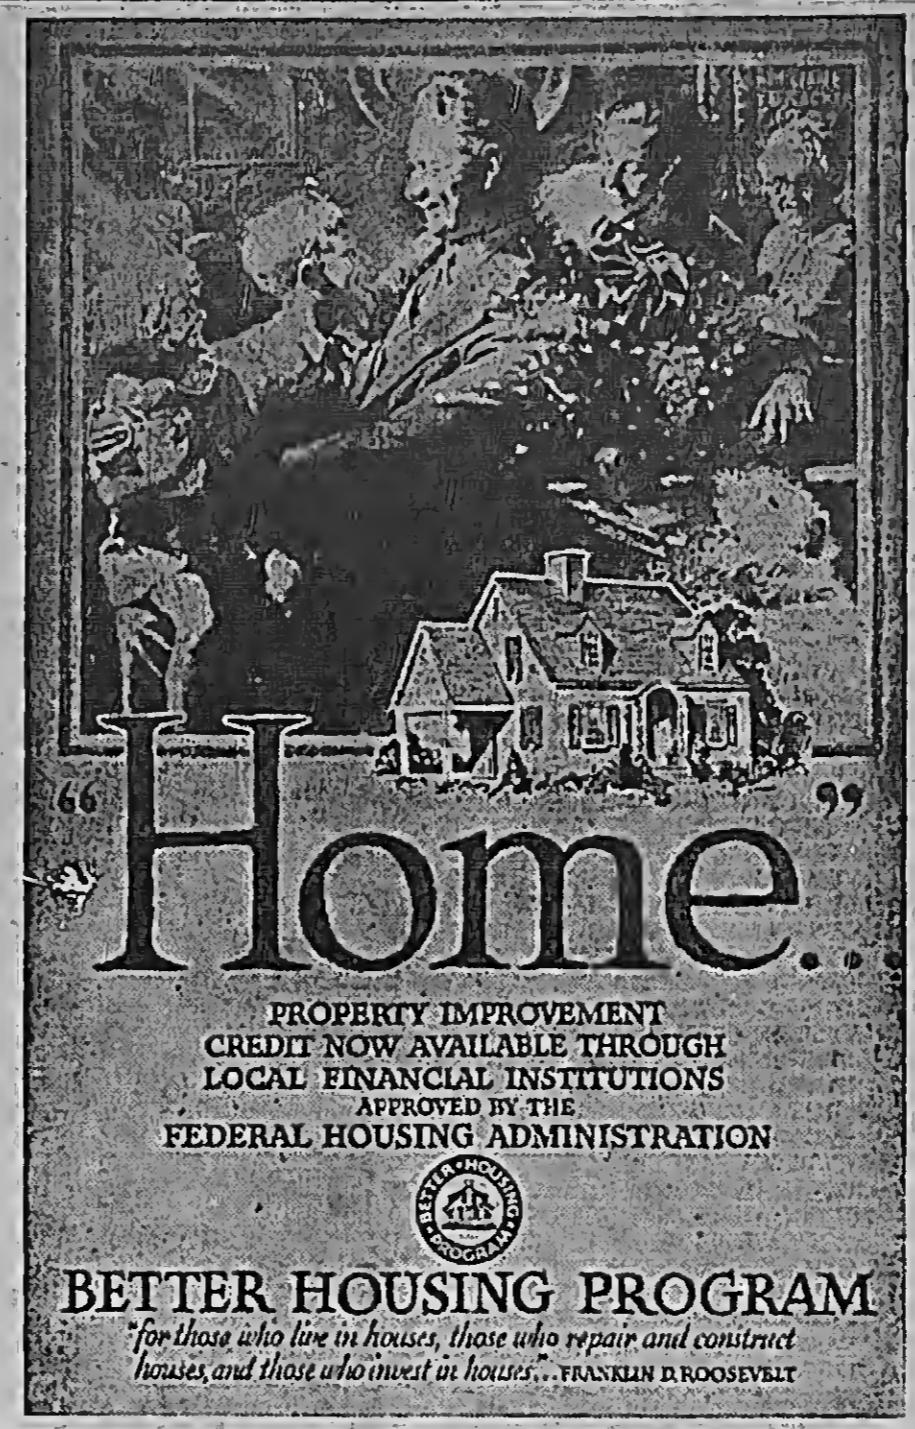

Good for Man and Beast
Dogs are blessed with the discovery of quinine, one of the most beneficial medicines supplied by Nature. Long years ago, the Incas of Peru noticed that dogs with sniffling noses sought out the bark of the cinchona trees. They'd chew some of it, and the sniffles would stop. The Indians tried it, found it good for colds, and it's been used by man ever since—Washington Post.

Octopus Uses "Smoke Screen"
One of the octopus' natural defenses is a thick, viscous, ink-black fluid which it injects into the water in vast clouds when attacked or disturbed. This is to confuse or blind its enemies, but apparently the monster itself can see quite well through the substance with its great owl-like eyes.

"Flawage Rights"
The expression "flawage rights" refers to the right of overflowing land when a dam is built for the purpose of furnishing irrigation or power. The person whose land is overflowed has right to compensation for any loss. When the right of overflowing a person's land is purchased, this is referred to as "flawage rights."

Colored Elephant Tusks
Although the tusks of the majority of elephants are "ivory" colored, thousands of these animals roaming the plains and forests of Africa have brown, rose and even black tusks.—Collier's Weekly.

Hints for Motorists
By C. R. Strouse
Director, School of Automobiles, International Correspondence Schools

BETTER HOUSING PROGRAM

for those who live in houses, those who repair and construct houses, and those who invest in houses...FRANKLIN D. ROOSEVELT

World War Day of Prayer
During the World War, President Wilson proclaimed three public days of prayer. The first, eighth of September, 1914, proclaimed October 4 as a day of prayer for the peace of the nation; the second, proclaimed the nineteenth of October, 1917, set October 28, 1917, as a day of prayer in connection with the entrance of the United States into the World War; for the triumph of the United States and Allies in a righteous cause; the third, proclaimed eleventh of May, 1918, set the thirtieth of May, 1918, as a day of prayer for counsel and wisdom for victory and peace and for a general confession of sin and declaration of reliance upon Almighty God.

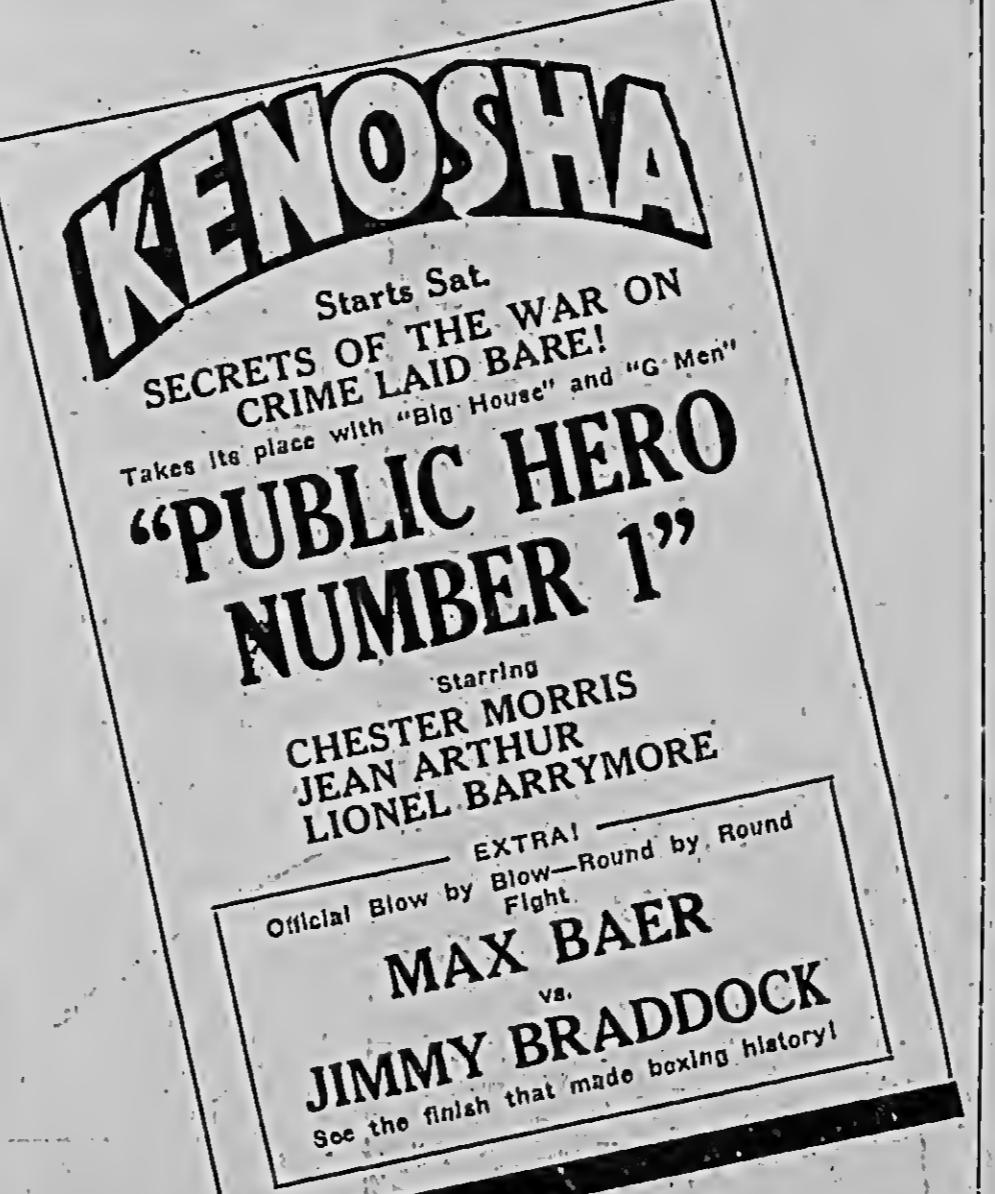

"Letter" Defined
According to the United States Post Office department: "A letter" is a message, notice or other expression of thought sent by one person to another. It is just as much a letter if sent in an envelope from one to another unsealed as if sealed, or whether in an envelope at all, if it is directed as a letter. If omitted conveys live, individual, current information between the sender and the addressee, upon which the letter may not, rely or refrain from acting, such matter is a "letter" within the meaning of the private express statutes."

To free a sticking valve caused by carbon and gummy deposits forming on the stem, heat the engine almost to the boiling point by covering the front of the radiator. Remove the spark plug from the cylinder containing the stuck valve. Pour about $\frac{1}{2}$ pint of denatured alcohol into the combustion chamber. Replace the spark plug as soon as possible to retain the alcohol fumes, and let the engine stand for 15 to 30 minutes. When the engine is again started, the gummy deposits and carbon will be blown out through the exhaust.

Japanese "No" Robes
"No" robes, Alan Priest, curator of the metropolitan department of Far Eastern art, explains, are the costumes worn during the presentation of the "No" plays. These were a development of ritual pantomimes and dances. By the Fourteenth century they had become definite stage plays, "in which the most precious legends and examples of behavior were set forth with music, chanting, dancing and oration."

Giant Jungle Animal
Twenty-five million years ago the Gobi desert in eastern Asia was a paradise of woods and waters. Through its jungles ambled the biggest land mammal that ever lived, a giant of flesh nearly 18 feet tall and 30 feet long, rather resembling his modern relative, the rhinoceros. The animal was the baluchitherium, so named because the first fossil remains were discovered in 1911 in Baluchistan.—Literary Digest.

Oldest Scholastic Athletics
The annual Thanksgiving football game between Boston Latin school and English high school is the oldest scholastic athletic rivalry on this hemisphere.

Non-Freezing Lake Gives Farmer Idea

Geneva, N. Y.—Farmer Dell had a great idea.

The farmer's inspiration came from a peculiarity of Seneca lake, one of the state's most famous beauty spots.

The lake seldom freezes, despite the fact that surrounding waters are sheets of ice. Only in the most severe cold spells will the lake develop more than skim ice.

Farmer Dell's idea, as he later admitted, was to fill the radiator of his automobile with Lake Seneca water, and save the cost of purchasing non-freezing agents.

To his surprise, the water which would not freeze in Lake Seneca turned to ice so quickly during a zero cold wave that the radiator burst in several places.

Wild Cherry In Demand

Wild cherry timber is in demand by cabinet makers because it takes such an excellent polish.

Road Warners in England
Road signs indicating railway crossings in England contain a picture of a locomotive.

SPECIAL MEETING of Millburn Mutual Insurance Company

A special meeting of the Millburn Mutual Insurance Company will be held in Masonic Hall, Millburn, Illinois, on Saturday, June 29, 1935, at 12:30 p. m., Daylight Saving Time, for the purpose of amending the By-Laws to permit water heaters in milkhouse. All members plan to attend.

J. S. DENMAN, Secretary.

Helium Gas

Helium gas was discovered on the sun long before it was found to exist on the earth. It has no color, taste, or smell. It does not burn nor support combustion. In fact, says a writer in the Chicago Tribune, it does not react with anything, even at the highest temperatures obtainable. It has been liquefied, but only at a temperature much lower than is required for any other gas. It is virtually insoluble in all liquids. It even comes rather close to having no weight. In short, it bears a distinct resemblance to an absolute void. It lacks even the rather spirited personality of a vacuum.

Producing Beeswax

Bees consume eight to ten pounds of honey in producing a pound of beeswax.

JELLO, CERTO MAXWELL HOUSE, POSTS SWANS DOWN & OTHERS GENERAL FOODS Sale A&P RESTAURANT

All of these five foods that you know and like are part of A&P's gigantic sale this week. Now is your chance to stock up on cereals, cake flour, baking powder, and other famous General Foods products.
